About me

Hello! I'm Mihajlo

As a third-year student in the Faculty of Electrical Engineering, specializing in Computer Science, I am deeply engaged in a dynamic and challenging academic journey. My studies have provided me with a solid foundation in both hardware and software, allowing me to bridge the gap between electrical engineering principles and cutting-edge computing technologies.

I've tackled complex programming, algorithm design, and even some hands-on work with embedded systems or circuit design. This coursework has strengthened my commitment to mastering both the theoretical and practical aspects of computing, preparing me for a future in the ever-evolving field of technology.

Native

Faculty Of Electrical Engineering

Since 2021, I have been actively developing my skills in applied computing at university. So far, I've gained a strong understanding of programming, data analysis, and software development, and I've started exploring algorithms, database management, and systems design. My studies are ongoing, and I'm continuing to enhance my problem-solving abilities and collaborate on projects with my peers.

Developers Lab MNE

I recently completed a one-month intensive Python course at Developers Lab, where I learned the language exceptionally well. The course was hands-on and immersive, allowing me to quickly grasp core concepts such as data structures, object-oriented programming, and web development with Python. Through real-world projects and challenges, I refined my coding skills and developed a deep understanding of Python's versatility, preparing me to apply it effectively in various computing tasks.

Career Path

Web Development

As a beginner in web development, I'm excited to be actively seeking a position where I can apply and expand my skills. My journey started during my university studies, where I learned the basics of HTML, CSS, and JavaScript, sparking a passion for creating dynamic, user-friendly websites. I recently completed a Python course at Developers Lab, building a strong foundation in back-end development.

In the coming months, I plan to dive into React and Django to enhance my abilities further. I'm eager to join a team where I can contribute, learn, and grow as a web developer. Check out my portfolio and GitHub to see my progress so far!

Software Development

In the coming months, I plan to dive into React and Django to enhance my abilities further. I'm eager to join a team where I can contribute, learn, and grow as a web developer. Check out my portfolio and GitHub to see my progress so far!

Software Development

Python has quickly become a key focus in my software development journey. After completing an intensive course at Developers Lab, I've been captivated by Python's versatility, from back-end development with Django to data analysis with libraries like Pandas. I'm excited to apply Python in building efficient, scalable solutions and am eager to find opportunities to further develop my skills.

Check out my portfolio and GitHub to see my work with Python, and let's connect if you're interested in exploring potential opportunities together!
